ARROWQUIP

# EASY FLOW®

# CATTLE

**MODEL:** 8' Alley [EF-08]

**WEIGHT:** 616 lbs.

**DIMENSIONS:** 34" w x 80" h x 93" l

**MODEL:** 10' Alley [EF-10]

**WEIGHT:** 723 lbs.

**DIMENSIONS:** 34" w x 80" h x 116" l

Arrowquip's improved Adjustable Easy Flow® Alleys are designed to be safer, quieter, and more efficient. Cradle-shaped and fully adjustable, the Easy Flow Alleys can accommodate cattle of any size with easy adjustments. Featuring spring-loaded locking systems and safety latches, adjustments to both sides of the alley can now be done at the same time.

To eliminate foot traps, the Easy Flow Alleys can bolt firmly together and have side panels that are sheeted to the ground, ensuring cattle safety as they move through the alley system. Additionally, both sides of the alley drop down fully in case of emergency.

With 3E™: Easy Entry and Exit in mind, the Adjustable Easy Flow Alleys feature removable panels that allow the rancher to customize what cattle can see in the system. By using the adjustable side panels properly and applying pressure zone handling techniques, cattle flow can be regulated with ease. For further customization and control, rolling alley gates and kicker panels can also be added to create the alley system of your dreams.

PATENT-PENDING

## PRODUCT WARRANTY

- Easy Flow Alleys - 3 YEARS

*Products must be registered to claim warranty. Contact your Authorized Arrowquip Dealer for more information.*

### 3E™: EASY ENTRY AND EXIT

- Control what cattle see by adjusting the removable panels to utilize light and point of balance handling techniques
- Lower bottom bar on the bows reduces foot traps upon entry and exit
- Lower sheeting simplifies handling when working with calves
- When combined with 3E BudFlow® Tub, the lower sheeted panels improve flow because cattle can see others ahead of them in the alley

### BETTER CATTLE FLOW WITH S-FLOW

- An S-Flow System generates constant flow of cattle by incorporating arcs into cattle handling systems.
- Based on cattle's instinct to follow curves, they are repeatedly convinced that they are escaping which prevents stalls in the flow of cattle.
- Unlike the start-stop method recommended for chute-ended systems, S-Flow is ideal when handling large groups of cattle for drafting or loading into a truck.
- You can create a curved system with the Easy Flow Cattle Alleys by adding kicker panels, and connecting a 3E BudFlow Tub to create the draw required for crowd movement.

### ENHANCED SAFETY

- Sides are sheeted to the ground to eliminate foot traps
- Lowered bottom bar allows for safe entry and exit
- Safety latches on the side panels add security and control when adjusting, and ensure the sides will not drop accidentally

ELIMINATE PIN RATTLING BY BOLTING ALLEYS TOGETHER

NYLON BUSHINGS REDUCE NOISE

CAULKING ELIMINATES SHEET METAL RATTLING

## CUSTOMIZABLE

- Two removable panels allow the operator to control what cattle can see, and can be bolted on the side panels when not in use
- 30° Kicker Panels create curved alley systems to maximize space and enhance flow
- Rolling Alley Gate can be added in between alleys to regulate flow
- Optional anti-backing system keeps cattle from moving backwards

## ADJUSTABLE

- Cradle-shaped alley accommodates animals of any size
- Both sides of the Adjustable Easy Flow Alley can be adjusted from one side
- Spring-loaded locking system allows for easy adjustments

## ADAPTABLE

- Durable panel clips seamlessly attach the Adjustable Easy Flow Alley to the rest of the cattle handling system
- Bows in between alleys allow the system to be laid on uneven ground

## EASY FLOW WEIGH CRATE INTEGRATED CATTLE ALLEY SCALES

- Optional conversion kit for 8' Easy Flow Alley Section turns the alley into a weigh crate
- Heavy-duty aluminum weigh platform with high sides so cattle will not slip off
- Cradle shaped cattle weigh crate integrates seamlessly within your alley system
- Adjustable from 29.5" down to 18" to work with livestock of any size
- Includes two rolling alley gates to segment the weigh crate within the alley system
- Adjustable 3E panels allow you to control what cattle see and minimize stress

## ALLEY CONFIGURATIONS

Use these designs as suggestions to create the ideal alley configuration for your operation. If you require assistance, contact the Arrowquip Team for a custom alley design!

### STRAIGHT ALLEY SYSTEM

- 4x 8' or 10' Easy Flow Cattle Alleys
- 2x Rolling Alley Gates
- Ranges from 32' to 40' of alley capacity, depending on combination of alleys used

### 90° CURVED ALLEY SYSTEM

- 4x 8' Easy Flow Alleys
- 3x 30° Kicker Panels
- 2x Rolling Alley Gates
- Provides 32' alley capacity
- Can also be made with 10' Easy Flow Alleys for 40' alley capacity

### 180° CURVED ALLEY SYSTEM

- 7x 8' Easy Flow Alleys
- 6x 30° Kicker Panels
- 2x Rolling Alley Gates
- Provides 56' alley capacity
- Can also be made with 10' Easy Flow Alleys for 70' alley capacity

# ADD-ONS

## DOUBLE ALLEY MERGE SECTION

The Merge Section is a cradle-style merge section that pairs with Easy Flow Alleys to create a seamless transition for cattle from a double to single alleyway. The spring-loaded swing gate enables cattle to merge into a single line without handler involvement, and the panels are sheeted to the ground to eliminate hoof hazards.

## 30° KICKER PANEL

Our 30° Kicker Panels provide the ability to create a variety of curved alleyway designs, giving you the freedom to customize your alley to be just what you need.

## ROLLING ALLEY GATE

Arrowquip's renowned Rolling Door allows you to control cattle movement through your system by placing alley gates in strategic positions. The offside operation handle comes standard, and each Rolling Door features a safety latch to lock the door closed when necessary.

## ADDITIONAL REMOVABLE SIDE PANELS

Each Easy Flow Cattle Alley comes with two removable panels that can be used in a variety of configurations to control what cattle see when moving through the alley and eliminate distractions. If you would like to block more from their view, you can add additional panels to raise the sheet height of the alley.

## ANTI-BACKING BAR

The Anti-Backing Bar can be installed into an alley section to prevent cattle from backing up and disrupting flow. The bars are adjustable to work with different heights of cattle, and can be moved through the alley section easily.

Arrowquip has been creating best in class livestock equipment since 1988 through an extensive research and development process that is unmatched in the cattle industry. We employ the only team of engineers specifically dedicated to cattle handling, and are constantly improving our equipment to adhere the latest recommendations from key researchers and cattle handling experts.

Every piece of equipment we design is intended to make managing your cattle faster, easier, and safer every step of the way. Why does that matter?

**Easier.** Working cattle is hard enough. Why make it harder on yourself with equipment that is difficult to use and requires frustrating adjustments? Our equipment is designed with ease of use for the operator in mind, with ergonomic handles and far less adjustments, to make working your cattle easier than ever before. You don't need to be 6' tall to use our equipment, either!

**Faster.** Too many cattle handling systems are designed without consideration for natural cattle behavior, which results in stubborn cattle

that refuse to move effectively. Arrowquip equipment works with animal science to get cattle to move through the handling system without delays, thanks to unique features like our patented 3E System that uses light to draw cattle from tub to chute.

**Safer.** Good help is hard to find, and getting harder every day. When you're out in the field with your kids, your brother, or your wife, you need equipment you can trust every step of the way. There is no room for error. Our equipment is designed with safety for handlers and cattle in mind, and undergoes extensive testing to ensure the equipment is reliable for your ranch.

From chutes for cattle to custom cattle working systems and pens, Arrowquip has a solution for all your cattle handling needs. For added security, our equipment is backed by industry-leading warranty. Let our generations of ranching experience and knowledge of cattle behavior help you develop a more efficient and profitable operation today, tomorrow, and for years to come.
