DIMENSIONS: 56" w x 93" h x 129" l

MODEL: STANDARD [5400MR]

WEIGHT: 1466 lbs.

DIMENSIONS: 56" w x 93" h x 102" l

DON'T WANT TO COMPROMISE? NO PROBLEM.

In a market that rarely meets the needs of smaller and up-and-coming ranchers and producers, the Q-Catch 54 Series is the solution to manage your livestock safer and easier. Based off the incredibly popular Q-Catch 74 Series cattle chute, the 54 Series provides ranchers with an affordable option to upgrade their ranch with new equipment.

The 54 Series offers full access on the working side of the chute, our patented 3E Head Gate and Direct Drive system, and the ease of use that is loved by ranchers around the globe who have used any Q-Catch model. With features like these, this base model chute is anything but basic.

UNLIMITED 5 YEAR WARRANTY

- Manual cattle chute - **5 YEARS OR 10,000 TOTAL HEAD OF CATTLE**
- Patented head gate friction locks – **LIFETIME**
- Patented squeeze friction locks – **LIFETIME**
- Rump fingers – **LIFETIME**

Products must be registered to claim warranty. Contact your Authorized Arrowquip Dealer for more information.

3E Q-CATCH HEAD GATE [PATENTED]

- Uses light to draw cattle into the chute
- Barred style allows cattle to see light past the head gate
- Patented locking mechanism features infinite adjustments
- Self-lubricating head gate rollers are maintenance-free
- Opens to a full 29.5" top to bottom
- Single lever push-to-close, pull-to-open operation never requires adjustments

HEAD GATE OPERATION HANDLE

- User-friendly handle that reduces operator's fatigue
- Handle can be situated anywhere along the side of the chute

DIRECT DRIVE SYSTEM [PATENTED]

- Enhanced design provides a direct connection from the control tube to the head gate
- Provides instant head gate response time
- Must be ordered in left or right-hand at the time of purchase, cannot be converted at a later date

12.75" ACCESS
TOP TO BOTTOM

STEEL FLOOR PROVIDES
GREAT TRACTION FOR
LIVESTOCK

RUMP FINGERS

- 4 rump fingers included on the top side access door to contain cattle securely
- Heavy-duty nylon rump fingers designed to endure high pressure
- Heavy-duty rubber-coated fiberglass rump bar that is light to use and does not slip

NEEDLE ACCESS [PATENT-PENDING]

- Removable needle access area provides excellent access to the neck
- 12.75" of space when removed

HIGHLY DURABLE STEEL FLOORS

- Made with first-grade North American steel
- Formed steel floor with 1/2" square bar treads for excellent cattle traction
- Easily cleaned with a pressure washer

SQUEEZE

- Single lever push-pull operation
- Designed to work with cattle of any size
- Patented lockbox on the squeeze offers infinite adjustments - **LIFETIME WARRANTY**

VET DOOR [DELUXE VET MODEL ONLY]

- Improved slam latch ensures the door won't swing through when slammed shut

ROLLING TAIL GATE

- Top-mounted to eliminate the issue of build-up

ADD-ONS

3RD GENERATION HEAD HOLDER [PATENTED]

The 3rd Generation Head Holder is a sturdy mechanism that clamps around the animal's neck, immobilizing the head. Featuring an upgraded design with thicker, heavier components and a single-lever push-pull operation, the head holder simplifies any procedure requiring access to the animal's head.

CALF RESTRAINER BAR

The Calf Restrainer Bar provides added safety when banding, trimming or branding cattle by tucking into the hip joint, immobilizing the hip. You can adjust the position and angle of the bar along the side of the chute to quickly adjust to different sizes of cattle.

STERNUM BAR

The sternum bar prevents cattle from going down in the chute. The improved design is sheeted to prevent hoof traps, and is easily installed or removed with 2 bolts.

BULL CATCHER

Add a focused pressure point to the head gate with the Bull Catcher to make catching and securing bulls, cows, and calves as easy as possible.

RUBBER NECK CUSHION KIT

Add the Rubber Neck Cushion Kit to your head gate to help reduce the chance of shoulder bruising and for added shock absorption.

Arrowquip has been creating best in class livestock equipment since 1988 through an extensive research and development process that is unmatched in the cattle industry. We employ the only team of engineers specifically dedicated to cattle handling, and are constantly improving our equipment to adhere the latest recommendations from key researchers and cattle handling experts.

Every piece of equipment we design is intended to make managing your cattle faster, easier, and safer every step of the way. Why does that matter?

Easier. Working cattle is hard enough. Why make it harder on yourself with equipment that is difficult to use and requires frustrating adjustments? Our equipment is designed with ease of use for the operator in mind, with ergonomic handles and far less adjustments, to make working your cattle easier than ever before. You don't need to be 6' tall to use our equipment, either!

Faster. Too many cattle handling systems are designed without consideration for natural cattle behavior, which results in stubborn cattle

that refuse to move effectively. Arrowquip equipment works with animal science to get cattle to move through the handling system without delays, thanks to unique features like our patented 3E System that uses light to draw cattle from tub to chute.

Safer. Good help is hard to find, and getting harder every day. When you're out in the field with your kids, your brother, or your wife, you need equipment you can trust every step of the way. There is no room for error. Our equipment is designed with safety for handlers and cattle in mind, and undergoes extensive testing to ensure the equipment is reliable for your ranch.

From chutes for cattle to custom cattle working systems and pens, Arrowquip has a solution for all your cattle handling needs. For added security, our equipment is backed by industry-leading warranty. Let our generations of ranching experience and knowledge of cattle behavior help you develop a more efficient and profitable operation today, tomorrow, and for years to come.
