

VET CAGE

ARROWQUIP

OUR PROMISE TO YOU

You work hard, day in and day out in the most adverse working conditions. When you put your life on the line every day to feed a world that often seems to be against you, it's time cattle equipment manufacturers step up and make your safety a top priority. With Arrowquip, your safety is guaranteed, or your money back.*

* More details: arrowquip.com/promise

WEIGHT: 295 lbs.

DIMENSIONS: 40" w x 80" h x 40" l

Arrowquip's Vet Cage provides a safe space for veterinarians to perform their important work. Featuring sheeted doors, heavy-duty construction, and a low-profile latch that ensures the doors will not swing through when slammed shut. The Vet Cage can also be used as a pass-through for operators, adding versatility to your cattle handling system.

SPECIFICATIONS

- Vet Cage doors open in both directions for a full 180° swing
- Low-profile cam-slam latches
- Can be used as a pass-through at any point in the system
- Works great with a load-out for handlers to move from one side of the system to the other
- Bottom half of the doors are sheeted to prevent foot traps, while the bars on the top half provide easy access for handlers

PRODUCT WARRANTY

- Vet Cage - 5 YEARS

Products must be registered to claim warranty. Contact your Authorized Arrowquip Dealer for more information.

Arrowquip has been creating best in class livestock equipment since 1988 through an extensive research and development process that is unmatched in the cattle industry. We employ the only team of engineers specifically dedicated to cattle handling, and are constantly improving our equipment to adhere the latest recommendations from key researchers and cattle handling experts.

Every piece of equipment we design is intended to make managing your cattle faster, easier, and safer every step of the way. Why does that matter?

Easier. Working cattle is hard enough. Why make it harder on yourself with equipment that is difficult to use and requires frustrating adjustments? Our equipment is designed with ease of use for the operator in mind, with ergonomic handles and far less adjustments, to make working your cattle easier than ever before. You don't need to be 6' tall to use our equipment, either!

Faster. Too many cattle handling systems are designed without consideration for natural cattle behavior, which results in stubborn cattle

that refuse to move effectively. Arrowquip equipment works with animal science to get cattle to move through the handling system without delays, thanks to unique features like our patented 3E System that uses light to draw cattle from tub to chute.

Safer. Good help is hard to find, and getting harder every day. When you're out in the field with your kids, your brother, or your wife, you need equipment you can trust every step of the way. There is no room for error. Our equipment is designed with safety for handlers and cattle in mind, and undergoes extensive testing to ensure the equipment is reliable for your ranch.

From chutes for cattle to custom cattle working systems and pens, Arrowquip has a solution for all your cattle handling needs. For added security, our equipment is backed by industry-leading warranty. Let our generations of ranching experience and knowledge of cattle behavior help you develop a more efficient and profitable operation today, tomorrow, and for years to come.
